SAFETY ZONE

BACK TO SCHOOL! School is back in session! Eliminate distractions near schools: Consider turning off or turning down the radio, do not use your cell phone, or adjust any other electronic devices, and increase your alertness in and around school zones. Anticipate the children will disobey posted crossing signs and be prepared to stop. Reduce your speed when traveling through school zones. Depending on the type of roadway the school zone is in, this speed limit could be as low as 10 or 15 mph. Regardless, the speed limit in school zones will be significantly lower than what is posted on other areas of the same roadway. Stay Safe, Stay Alert, and Drive Safe!

PAY ATTENTION! "I never saw him!" is one of the most common excuses heard after a collision. Was the other vehicle invisible? Virtually all collisions involve inattention on the part of one or both drivers. Inattention can involve many things, some of which are daydreaming, distractions, sleepiness, fatigue, "highway hypnosis," eating or drinking, talking, cell phones, blue tooth, and such. Such distractions are estimated to be a factor in 25-50% of all traffic crashes - or up to 8,000 crashes every day. In 2017 alone, distracted driving claimed 3,166 lives.
